Resecurity

Who We Are

Resecurity is a cybersecurity company that delivers a unified platform for endpoint protection, risk management, and threat intelligence for large enterprises and government agencies worldwide. Unlike other threat intel companies that only provide data lakes and visualization, without any meaningful correlation or analysis, Resecurity delivers human-curated, in-depth analysis, layered on top of the most comprehensive, exclusive sets of data from the Deep and Dark Web.

Why What We Do Matters

Today, it's not enough to know what's happening IN your network. Organizations must have situational intelligence as to what's happening outside their environment - who's targeting them, how are they behaving, and who's working together to put your company at risk? We deliver Human-curated, in-depth analysis.

Our mission is to combat cyber threats for organizations of all sizes, making the world a safer place for everyone.
The Hunter Unit

The Hunter Unit™ is an elite group composed of subject matter experts experienced in technology development and malware research, network exploitation, network and system defense strategies and more from backgrounds in law enforcement, government and military agencies, and enterprises. The Hunter Unit is the offensive line against threats, curating all the data intelligence behind Resecurity's Context™ platform, validating that information and delivering it in the most actionable format to customers.
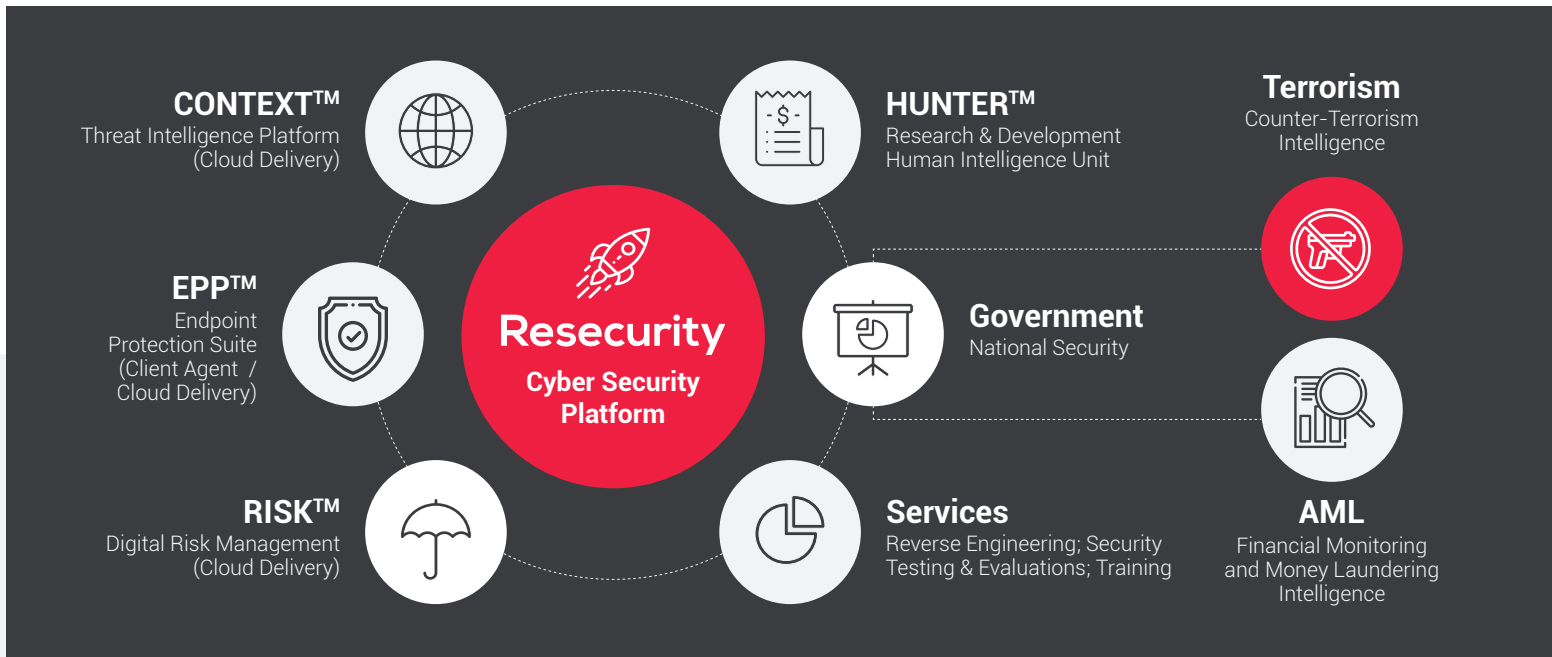

About Our Products

Resecurity's Context™, a cyber threat intelligence platform for enterprises and government agencies, delivers cyber threat intelligence harvested from millions of data points combined with data science, allowing for actionable insights.

Risk™ product calculates a daily security score based upon a summary of all risks for a company's monitored domains, IP, network, vulnerabilities and cloud services. Geo-location capability delivers contextual information identifying low, medium and high-risk areas for managing infrastructure, network resources and other company assets.

Our Customers

At Resecurity we are passionate about protecting our clients. Working with Resecurity, companies can easily and efficiently collaborate across their vulnerability and risk, threat intelligence, penetration testing and broader security teams to quickly reduce fraud, minimize the attack surface of an organization, and shut down ongoing attacks, saving their companies millions of dollars.
